

Press Release

## **Test Lamp for Multispectrum Flame Detectors**

ProDetec announces the availability of a new Hazardous Area Certified Test Lamp for its range of Multispectrum Optical Flame Detectors covering both IR3 and UV/IR detection range.

The LT15 is a handheld flashing test lamp for functional test of optical flame detectors. The emission spectrum of the lamp covers both UV and IR detection range. The emission is modulated to simulate the typical flickering of flames. This allows testing of most UV, IR and UV/IR flame detectors as well as Simtronics range of MultiSpectrum Optical Flame Detectors (IR3 & UV/2IR)

It is ATEX approved Ex d IICT6-T5 and suitable for operation in hazardous areas, (area 1 and 2) in accordance with the EN 60079-0 and EN 60079-1 (2004) standards.
