

AVEVA Instrumentation; instrument and systems engineering, design, documentation and management for the entire plant lifecycle.

AVEVA Instrumentation provides a comprehensive, powerful and intuitive suite of software tools which support the entire lifecycle of a plant's instrumentation and control systems. Engineers and plant designers will find their work easier and more productive, thanks to its extensive catalogue- and rules-based functions and unique features such as graphical 'drag and drop' design. Plant operators will appreciate a dedicated, affordable solution which makes handover and commissioning more efficient and which goes on to save time and cost throughout the continuing processes of maintenance, modification and upgrade.

Customer evaluations have consistently reported substantial gains in productivity compared with rival products. To see why, visit www.aveva.com/instrumentation for product information. To see AVEVA Instrumentation in action, visit www.aveva.com/events for details of AVEVA roadshows and events near you, or contact your nearest AVEVA sales office to arrange a demonstration on your premises.

AVEVA Instrumentation is part of the AVEVA Plant and AVEVA Marine portfolios. AVEVA Plant is a set of integrated applications for plant engineering, design and design management. Now with [AVEVA PDMS 12](#) and other [12 Series products](#), it provides the fastest, most productive and risk-free tool set to design, build and revamp plant of any size and complexity. AVEVA Marine is a set of integrated marine design and production applications. It provides the fastest, most productive and risk-free way to design and build large, complex ships and offshore vessels.

AVEVA's other portfolio of solutions is AVEVA NET which is the core of AVEVA's lifecycle management and Open PLM solutions. AVEVA NET provides a powerful, ISO15926-compliant information management hub to control, link, evaluate and deliver all types of data and documents - not just engineering information - in a secure environment, regardless of application and format.

AVEVA Group plc is one of the world's foremost and fastest-growing lifecycle engineering IT solutions and services providers to the oil and gas, pulp and paper, power, chemical, pharmaceutical and shipbuilding industries. Listed on the London Stock Exchange (LSE:AVV), the Group has grown consistently since 1967 on the strength of pioneering engineering technology that protects the information assets of its customers from the volatile nature of the IT industry.

The Group's history of innovation spans five decades and has produced most of today's major engineering IT technologies. Serving over 1900 clients, AVEVA has a dominant position in many market sectors both on and offshore.
